

Technology about the Article

Pml

Positive	Negative	Intrestesting
The development of renewable energy	large use of fossil fuels	I want to learn more about deforestation because I did not know alot about it
Technology help conserve natural resource and to protect wildlife	increase greenhouse gas emission	I would like to know about technology in the past.
GPS tracking and camera Example use monitor ,protect endangered species	Deforestation has increase and trees being cut down and the land being cleared	I would also like to learn more about the Ecosystem
Online platform help people involved and make positive impact	Environment is harm through pollution	
Help environment -Solar panels, hydroelectric power plant of nature without burning fossil fuels	Manufacturing and transportation produce harmful products that impact air, water quality	
Help environment-Help Reduce gas emission from climate change	With more land, house industry forest other natural places are being damaged	
Develop eco friendly product Example reusable water bottles	Plants and animals depend on ecosystem to stay alive	
Increase online shopping -easy to buy things without driving to the store	Climate change a long term change temperature and weather caused by human activity especially the burning of the fossil fuels	

Solution for responsible technology use:

-Minimizes harm to the environment example eco-friendly product using energy efficient appliances

Technology about the Article

Pml

think of how technology and ways to reduce impact

- the use of fossil fuel

- Renewable energy sources

Some Solution For The Future

- developing cleaners technologies produce fewer emissions and waste

- Everyone working towards the Environment will help the future.

- Improve resource-recycling and reusing materials

-

Question 2

Technology has changed over time before technology was simple and had little effect on the environment. Now we use technology everyday and it affects the world.

There are positive and negative ways that technology affects the environment. One positive thing is online shopping. When people shop online they do have to drive to the store so there will be less pollution.

A negative impact of technology is climate change.

Climate change has changed the temperature and weather by human activity. In this video it helps people get

involved by working together to protect and live in a clean environment. Things people can do is use eco-friendly products. For example, use water bottles and recycling bags to help protect the environment.

Question 3

Yes this video was good for our society because it helps teach us about Technologies in the environment. Also this video teaches us what we could do for the future with all the technology. I think this video was good because it compared the past to the present technology .
